- Conduct Ground Penetrating Radar testing
- Analyze diagnostic artifacts
- Quantify large materials in the field

CONCERNS / ISSUES:

- The purpose of this grant appears to be to do archaeological work ahead of proposed construction projects. While there is no open Section 106 or Chapter 267 review right now to review any of this work, one would be required if such work were to proceed. We are concerned that the grant would pay for an archaeology survey project that would be required in advance of a project with State or Federal permitting or funding once they begin the Section 106 or Chapter 267 permitting process which is a non-allowable expense per our program guidelines.

PROFESSIONAL SERVICES ASSESSMENT:

Professional archaeological services are required and were included in the project scope of work and budget.

STANDARDS COMPLIANCE:

The archaeological survey report shall conform to Chapter 1A-46, Florida Administrative Code.

SCOPE ASSESSMENT:

No proposed scope of work adjustments are recommended.
