148	Cultural and Community Impact first and foremost - this project will be a long-term investment into whatever community receives the honor. I think it's imperative to select this location with the future in mind - "What does this area look like in 15-20 years?" "How can this development bring positive change, not just the state/country, but to this community directly?" "Is there an opportunity for this museum to grow with this community?" Secondly - Cost - As with most things, budget is a major (often, thee major) factor. While a very small city may be cost effective, I think it's important to consider the middle ground - an area that has development, infrastructure and a strong community involvement, that offers generous credits and land concessions to build. 186	Ease of people to access it. Ease of management. We should be building Tallahassee into the true government center for our state and students should field trip to Tallahassee from across the state - it should be part of a full developed experience of Florida and government- but failing that- it can partner with famu and the grove and other buildings to provide a well rounded educational experience	2/28/2024 7:40 AM

There's probably research on this topic. How far will tourists go to visit a city that has a single historical site? In Orlando we know tourists come frequently and therefore more might be interested in visiting such a museum while they're here. Plus we will have the Holocaust Center here as well.
